

Test it like a stranger.

A project is ready to share when a person can understand the main action without you narrating every click.

For: Student. This is a living resource. Find the current online version inside the First Build resource library.

Main action

Try the project in the simplest possible way.

- The page opens.
- The main action works twice in a row.
- The words make sense to someone new.
- Buttons look like buttons.
- The project still works after a refresh.

Human test

Watch more than you explain.

- Ask: What do you think this does?
- Ask: What would you click first?
- Ask: What confused you?
- Write down the three clearest fixes.

Homegrown Builders is an AI project studio for teens. Parents approve accounts, public sharing, and purchases.
